## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims **1-14, and 29-49**, drawn to a method for deriving factors for determining the business value of applications corresponding to a cost model, classified in class 705, subclass 400.
  - II. Claims **15-28**, drawn to a method for manipulating data in order to derive organization specific values, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as using a cost model to determine specific coefficients related to the business value of an application. Invention II has separate utility such as inputting and manipulating data for the purpose of generating business related values. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
